

Product List

TethaPod Starter Kit

October 2016

(Part number SDx-K1)

Comprising:

1 tethaPod (Part number SDx-R1)
1 SDx RC test card (part number SDx-A2)
10 tethaPlate Cartridge Assembly (Part number SDx-T10)
1 vial of Second Layer lipids (Part number SDx-S1)
Clamp and slide assembly jig (Part number SDx-A1)

TethaPatch Starter Kit

(Part number SDx-K2)

Comprising:

tethaPatch (Part number SDx-R2)
 SDx RC test card (part number SDx-A2)
 tethaPlate Cartridge Assembly (Part number SDx-T10)
 vial of Second Layer lipids (Part number SDx-S1)
 Clamp and slide assembly jig (Part number SDx-A1)

TethaPlate – Lipid Coated Gold Electrodes in Flow Cell Cartridge Assembly (Part numbers SDx-T1, SDx-T10)

(supplied in pack of 10)

Comprising:

Six electrodes of coated gold on a polycarbonate slide supplied in sealed Alfoil pack. Polycarbonate flow cartridge with gold coated counter electrode and adhesive laminate to attach slide to cartridge.

Lipid Coatings on Electrodes: Benzyldisulphide, bis-tetraethylene glycol spacers plus Benzyldisulphide, bis-tetraethylene glycol C16 phytanyl half membrane spanning tethers in a tether ratio of 1% (**SDX-T1**) or 10% (**SDX-T10**).

Shelf life – 9 months@4C Other tethering ratios are available on special request.

Product List

October 2016

TethaPlate – Gold Electrodes (uncoated) in Flow Cell Cartridge Assembly (Part number SDx-BG) (supplied in a pack of 10)

Comprising:

Six electrodes of coated gold on a polycarbonate slide supplied in sealed Alfoil pack.

Polycarbonate flow cartridge with gold coated counter electrode and adhesive laminate to attach slide to cartridge.

Second layer lipid

(Part number SDx-S1)

Comprising:

1ml glass vial containing 70% C16 diphytanyl phosphatidylcholine 30% C16 diphytanyl glycerol in 99.9% ethanol

Other mobile lipid formulations are available on special request

Tethering lipid mix

(Part number SDx-S2)

Comprising:

5ml glass vial containing 90% Benzyldisulphide TEG OH 10% Benzyldisulphide PEG phytanyl in 99.9% ethanol

Other tethering lipid formulations are available on special request

Clamp and slide alignment jig (Part number SDx-A1)

Comprising:

Materials to attach the slide with electrodes to the flow cell cartridge

SDx Tethered Membranes Pty Ltd. 6/30-32 Barcoo St Roseville NSW, 2069. Telephone 61 2 9417 3003 www. sdxtetheredmembranes.com

Product List

October 2016

TethaPatch

(Part number SDx-R2)

Comprising:

A connection for flow cell cartridges to allow use with external EIS systems

tethaPod (Part number SDx-R1)

A reader of resistance and capacitance on six channels simultaneously. Type B, USB lead. Software and analysis package. Instruction manual

SDx RC test card (Part number SDx-A2)

Comprising:

A test cartridge containing RC circuit components to be used for reader QC

tethaPod Software (Part number SDx-B1)

Comprising:

Software for use with tethaPod to process data and display conductance, impedance and capacitance measurements from the tethaPlate electrodes.
